

## Connection Guide for Z720i handset on Windows 2000

Handset setup.....	1
Establish a dial-up connection .....	2

Z720i

### **Handset setup**

Setting the modem speed to 230K:

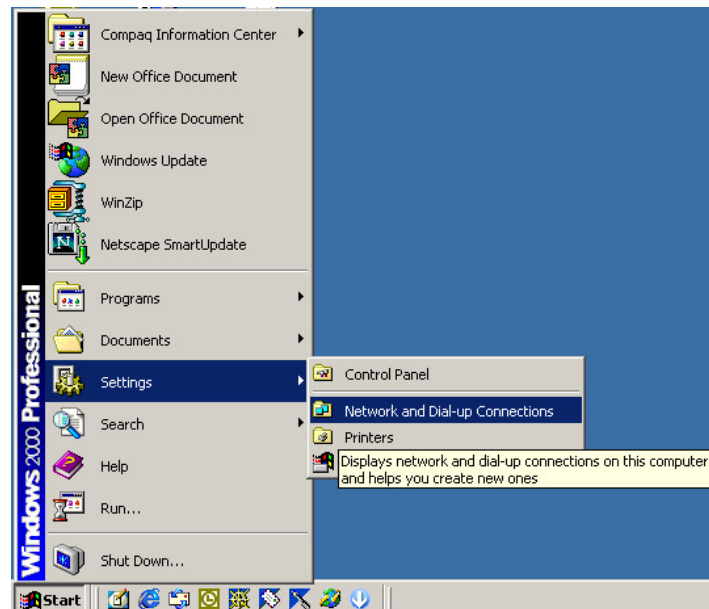

1. Press Menu
2. Press 8
3. Press 6
4. Press 2
5. Select "230400bps" option
6. Press OK

## Establish a dial-up connection

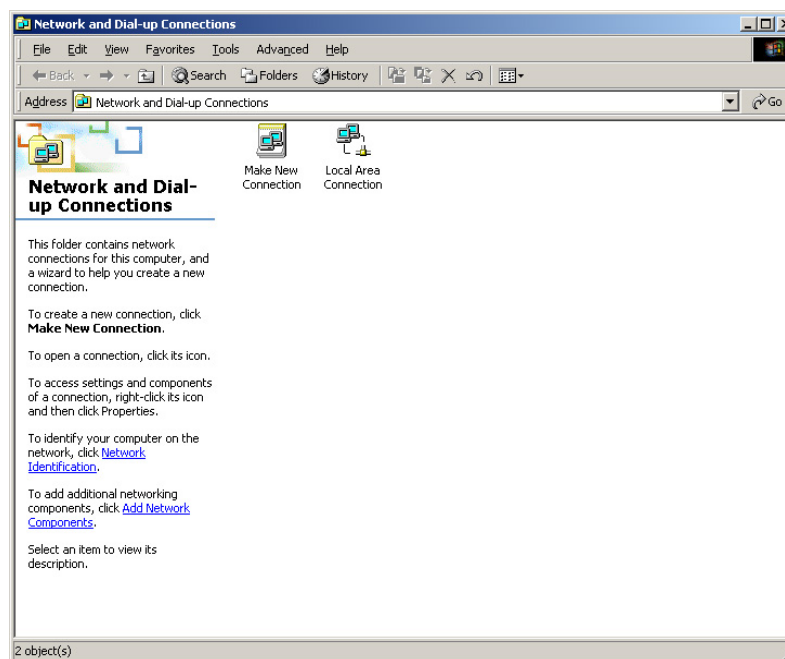

After you have installed the drivers (using the application included on the CD – **PCSync**), you may configure the internet connection manually, following these steps:

1. Click Start.

Move Mouse on Settings and then click on Network and Dial-up Connections

2. As result, Network and Dial-up Connections window will show up.

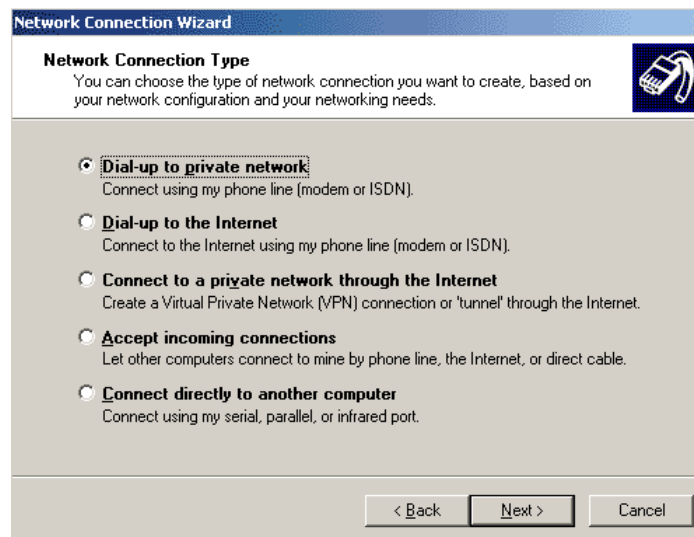

3. Double-Click on Make New Connection

As result, Network Connection Wizard window will show-up.

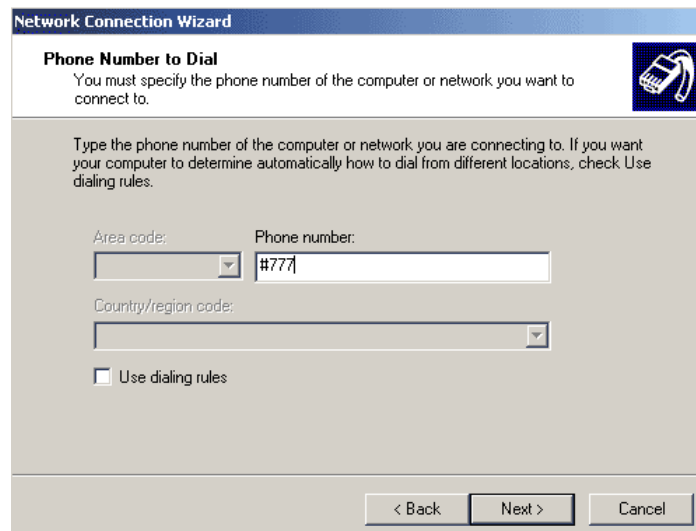

4. Click "Next"

5. Select "Dial-up to private network"  
Click "Next"

6. Select the modem device: Curitel Packet Service  
Click "Next"

**Network Connection Wizard**

**Phone Number to Dial**  
You must specify the phone number of the computer or network you want to connect to.

Type the phone number of the computer or network you are connecting to. If you want your computer to determine automatically how to dial from different locations, check Use dialing rules.

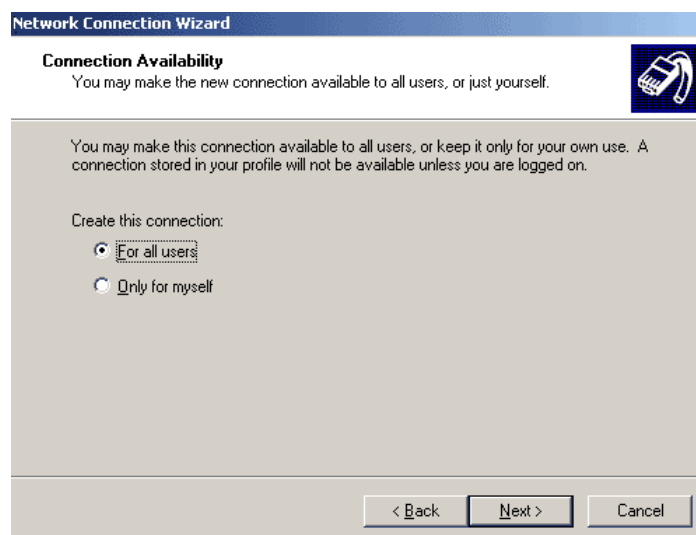

Area code:  Phone number:

Country/region code:

☐ Use dialing rules

< Back Next > Cancel

7. The phone number to dial is: #777  
Click "Next"

**Network Connection Wizard**

**Connection Availability**  
You may make the new connection available to all users, or just yourself.

You may make this connection available to all users, or keep it only for your own use. A connection stored in your profile will not be available unless you are logged on.

Create this connection:

☒ For all users

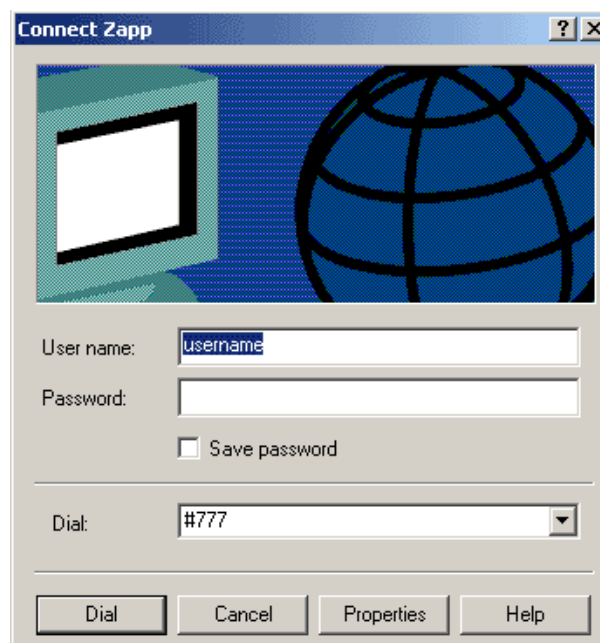

☐ Only for myself

< Back Next > Cancel

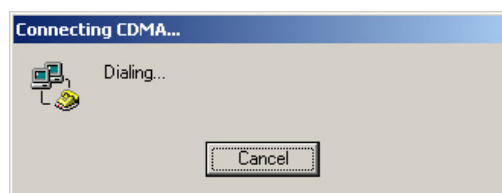

8. Select an option (i.e. For all users)  
Click "Next"

9. Type a name for the connection (i.e. Zapp )  
Click "Finish"

10. Enter any user / password then press "Dial"  
As result the dialing window will show up.

Wait until the connection is established. This may take a few seconds.
